Quality Technician

About the Job

Quality Technician

Get Connected with a new career at SAF HOLLAND, where global success comes from combining the power of innovation with the ingenuity of highly trained and talented professionals to manufacture the most efficient coupling devices for the heavy transportation industry.

You will test and inspect products at various production stages in order to compile/evaluate statistical data to determine and maintain quality and reliability. You will also monitor SPC activities, recommend modifications, and set up and perform destructive/nondestructive tests on materials, parts or products.

Be involved with warranties, resolving customer return issues, and be involved in PPAP, FMEA's, 8D's, DOE, and DFM efforts. Manage gauge calibrations and handle discrepancies.

A 2-year certificate from a college or technical school and 1-2 years of related experience and/or training are required. Qualified candidate will also have strong computer and communication skills.

We offer a competitive starting salary and benefit package. Qualified applicants should apply to:
